

Rate pubs with your friends and see them on a map. Everyone in your group scores the same five things, so the map fills up with a shared, honest picture of where's actually worth going. Here's everything you need for your first visit.

GETTING STARTED

1

Sign in

Continue with Google, or enter your email and we'll send you a sign-in link. No password to remember.

2

Pick your name

This is how your ratings are signed. Rated pubs before? Type that same name to pick your history back up.

3

Join your group

Tap a friend's invite link and you go straight in. Otherwise enter the invite word, or start a group of your own.

RATING A PUB

Tap **+ Add a pub**, type the name and area (e.g. "Bristol, Kings Street"), then slide the five scores from 0 to 5.

Location

Getting there, and what's around it

Beer Selection

Range, quality, and how it's kept

Value

What you got for what you paid

Facilities

Loos, seating, garden, the practical stuff

Vibe

The bit that's hard to name but you know it

The five combine into one score out of 10, shown live at the bottom of the form. You can add a short note (200 characters) and a photo. Rate the same pub again any time — your new scores replace your old ones rather than piling up.

FINDING YOUR WAY AROUND

- **The pins** show each pub's group average and take their colour from it — red is rough, green is good.
- **Tap a pin** for the full breakdown: every category, who rated it, their notes, and their photos. Tap a photo to enlarge it.
- **The panel** has two tabs — Leaderboard and Activity. On a phone, swipe between them, and tap the title bar to slide the panel up or down.
- **Filter the board** by city, or by author to see one person's own numbers instead of the average. Sort by any single category to find the best beer or the best value.
- **Your avatar**, top-left, is where you switch group, invite someone, create a new group, or sign out.
- **Inviting a friend** sends them a link that drops them straight into your group once they've signed in.

PUT IT ON YOUR HOME SCREEN

PlotMyPub installs like a proper app — its own icon, full screen, no browser bars. It takes about ten seconds and there's nothing to download from a store.

iPhone & iPad

1. Open **plotmypub.com** in **Safari** (this only works in Safari).
2. Tap **Share** — the square with an arrow out of the top.
3. Scroll down and tap **Add to Home Screen**.
4. Tap **Add**. The icon appears with your other apps.

Android

1. Open **plotmypub.com** in **Chrome**.
2. Tap the **⋮** menu, top-right.
3. Tap **Add to Home screen** or **Install app**.
4. Confirm with **Install**. Chrome may also offer this as a banner.
